RE: New Boiler

Dear Erika,
Here is the proposal for the new boiler that has failed.

Scope of Work

- We will supply a new FTX850 boiler.
- We will take out the old boiler.
- We will supply all the material needed to complete the install.
- We will run all new vent lines for the boiler.
- We will install the new boiler and provide the startup and training as well.

Cost \$34,427.00

Scope of Work

- We will take out the old heat exchanger in the boiler that has failed.
- We will send the bad heat exchanger back to Lochinvar and see if they will cover it under warranty.
- We will order a new heat exchanger and install it.
- We will complete the heat exchanger install and startup.

Cost \$20,407.00

Scope of Work

- Redo vents on boiler that is working at this time.

Cost \$3,520.00

Clarifications

It is my opinion that the boiler that failed needs to be replaced and not just the heat exchanger replaced. We inspected the heat exchanger on the boiler that is working at this time, and I think it looks pretty good and should run fine for a while yet. We will send in the failed heat exchanger no matter what, and if they do warrant the old heat exchanger and send us a new one, we would install it in the boiler that is running at this time. We will also redo the vents on both boilers no matter what.

We Sincerely appreciate the opportunity to quote this work to you! We look forward to working with you and please feel free to contact us with any concerns or questions.

Sincerely,

Dan Wiley
