## **A Message from the Ohio Department of Health**

The Ohio Department of Health (ODH) is committed to providing technical assistance to schools who are interested in pursuing 100% tobacco-free policies as a best practice to prevent tobacco use among youth, address youth e-cigarette usage, and create an environment supportive of quit attempts among youth who smoke. Annually, the Tobacco Use Prevention and Cessation program reviews each school district's policy against model policy language. Currently, due to changes in Ohio's state law and in product availability and use, the model policy is being updated to reflect definitional changes and recommended changes to student discipline. Over the course of the next year, an updated toolkit will be shared with schools and ODH and partners will provide training about the new language changes. These changes will necessitate rescoring of the current school policies to incorporate changes to the policy language. New scoring will not begin until January of 2024, in order to give school districts time to evaluate and change policies, if they choose. Efforts have been made to align the new model language with the NEOLA's optional policy templates.

## **District-Specific Material**

If the District chooses to adopt a new policy or guideline or incorporate District-specific material into an existing policy or guideline other than what has been proposed by NEOLA, then the District agrees to hold NEOLA harmless for those District-specific edits and acknowledges that NEOLA's warranty for legal challenges to that District-specific language in that policy or guideline will not be in effect. In addition, NEOLA retains ownership of the text from the original policy template that remains in a policy to which District-specific material has been added. District-specific materials include the following:

- A. Materials from the District's existing materials that the District requests be incorporated during the drafting process;
- B. New materials that the District develops in their entirety and exclusive of NEOLA; and
- C. Revisions or deletions that substantively depart from NEOLA's templates.

Further, NEOLA does not recommend the use or incorporation of District-specific materials. NEOLA will, at the request of the District, incorporate District-specific materials into the licensed materials, with the implicit understanding that the District bears all risks associated with the District's decision to request that such District-specific materials be incorporated. NEOLA reserves the right to, but is not obligated to, advise the District to seek its own legal review of District-specific materials.
